Dear Sir,

Equipment was installed on 28-06-2005 and both units have been working ever since.

Fish seed was introduced in May/June 05 the size was ONE inch. Sample netting was done on 28/07/05 the average size was 3.5 inches compared to other nurseries with seed of the same lot there is growth increase of 20% to 25% and seed is more active.

Both the units have been installed as shown in the diagram on the reverse.
